

IN THE CLAIMS

Please enter the following Amendments:

Please cancel Claim 6, without prejudice.

Please add the following new claims:

20. (New) A disposable bag adapted to contain breast milk, comprising a flexible closed enclosure defining a chamber adapted to contain therein breast milk, said enclosure being permanently sealed except at one portion thereof which comprises a bag access adapted to substantially seal said bag in a first position thereof but also adapted to selectively allow in a second position thereof the breast milk to be introduced in said chamber when it is desired to use said bag, whereby once in said second position the breast milk can be received in said bag, wherein said bag comprises a section located remote from said enclosure and adapted for receiving thereon information about a content of said bag.

21. (New) A disposable bag as defined in claim 20, wherein said section comprises at least a first area for indicating thereon a date of filling of said enclosure with breast milk.

22. (New) A disposable bag as defined in claim 21, wherein said section also comprises a second area for indicating thereon a volume of breast milk introduced in said enclosure.

23. (New) A disposable bag as defined in claim 20, wherein said bag is made from a plastic tube permanently closed at a lower end thereof by a lower seal thereby delimiting a bottom end of said enclosure, said section extending from said lower seal away from said enclosure.

G' 24. (New) A disposable sterile plastic bag in combination with a bag holder, said bag being adapted to contain milk, said bag holder comprising a hollow body and a cap provided with a nipple and being adapted for feeding a baby, said bag holder being adapted for receiving therein said bag, said bag comprising a flexible closed enclosure defining a chamber adapted to contain milk therein, said enclosure being permanently sealed except at one portion thereof which comprises a bag access adapted to substantially seal said bag in a first position thereof but also adapted to selectively allow in a second position thereof the milk to be introduced in said chamber when it is desired to use said bag, wherein, once in said second position, a top end of said bag can be folded over an upper end of said bag holder with said cap being engageable to said upper end of said bag holder for imprisoning said top end of said bag between said cap and said upper end of said bag holder such that said bag hangs in said bag holder with milk being introduced in said bag at least one of before and after said bag is inserted in said bag holder and mounted thereto, wherein said bag comprises a section located remote from said enclosure and adapted for receiving thereon information about a content of said bag.

25. (New) A method of substantially sterilely handling breast milk, comprising the steps of:

- a) providing a closed disposable sterile bag comprising a tear off strip and providing a bag holder;
- b) removing said tear off strip to reveal a milk receiving chamber of said bag; and
- c) mounting said bag to said bag holder; wherein milk is introduced in said chamber between said steps b) and c) or after step c).

26. (New) A method as defined in claim 25, wherein after step b), said bag is attached to a breast pumping device such that breast milk retrieved by said pumping device is directly delivered through into said bag.
